

Day 2

Explorer Field Log: Questions

Reflect on what you noticed during your observations of your species. What questions do you wish you could answer? Maybe it's about what behaviors your species engages in most often, or what they eat. Write an explorer question about your behavior.

MY SPECIES IS: _____

My explorer question I'm curious about is:

Think about how you would start to answer these questions. What tools would you need? Explorers are often using basic tools like writing utensils, cameras, recorders, or researching online.

Make a prediction about the question you are asking. What do you think is most likely the answer, based on your background research?
